Valdomiro Souza

Technology Executive @ Zenvia | Head of IT | Product & Engineering | Observability | Hybrid Cloud | InfoSec | FinOps | SRE | CPaaS & SaaS at Scale | MSc Student in Applied Computing @ Unisinos

Greater Porto Alegre

Summary

I lead technology organizations where reliability, engineering, security, cost discipline and platform scale directly affect business performance.At Zenvia, I lead technology leaders overseeing 40+ professionals and the platforms that support R$800M+ in annual revenue. Our CPaaS environment is engineered to handle peak loads of 1M+ transactions per minute across messaging and voice services.My current scope across Zenvia's CPaaS Business Unit includes Product, Engineering, Infrastructure, SRE, Information Security (InfoSec), observability, FinOps and business continuity.Over 30+ years in technology and 13+ years at Zenvia, my responsibilities have evolved from infrastructure and operations to broader technology leadership. My focus remains practical: business continuity, resilience, risk reduction, cost efficiency and execution at scale.A Few Numbers That Define This 13+ Year Journey:• Sustained 100× transactional growth in a large-scale CPaaS/SaaS environment.• Built the corporate SRE organization to 9 squads and 35 engineers.• Drove a FinOps program that delivered R$5M + in savings over 24 months.• Integrated 10 M&A operations with zero impact to core services.• Led zero-downtime datacenter migrations across databases, applications, distributed infrastructure and high-volume messaging platforms.• Evolved observability for an estate with 300K+ monitored items and 10K+ collections per second at peak.Continuous learning has been a constant throughout my career. Since last year, I've also been pursuing an MSc in Applied Computing at Unisinos. My research explores Agentic AI as a copilot for incident response, focusing on reducing MTTD, MTTR, and the cognitive load on technical teams. The research is a direct extension of an operating challenge I have worked on for years: helping people make better decisions, faster, in complex production environments.

Experience

ZENVIA

13 years 10 months

Head of Information Technology

December 2025 - Present (11 months)
São Paulo, Brazil

Senior IT Manager

October 2024 - November 2025 (1 year 2 months)
São Paulo, Brazil

Information Technology Manager

January 2013 - October 2024 (11 years 10 months)
São Paulo, Brazil

Timeline

Regulatory (Anatel 2012-2016)

• Led all 9 phases of the national Anatel regulatory program (9th digit), improving critical processes, mitigating operational risks and ensuring full large-scale compliance across carriers.

IaC & Automation (2013 to 2022)

• Launched the company’s automation journey (2013–2015), delivering the first fully automated product.
• Adopted Ansible and Terraform as core IaC foundations (2019).
• Established a complete GitFlow-based automation model for infrastructure and deployment pipelines (2022).

Monitoring, Observability & Logging (2015 to 2025)

• Replaced legacy Nagios/Centreon with Zabbix, Grafana and InfluxDB (2015).
• Designed a unified observability platform with Prometheus and Thanos (2021).
• Centralized corporate logging using AWS OpenSearch (2021).
• Consolidated all logs into Grafana Loki (2025).

Scalability & High Availability (2016 to 2021)

• Scaled monolithic systems to tens of millions of daily transactions using HAProxy (2016–2017).
• Deployed the company’s first Kubernetes and MongoDB clusters; initiated microservices adoption (2017–2018).

• Enabled multi-million SMS/hour throughput using Kafka (2019).
• Led WhatsApp-scale architecture supporting tens of thousands of microservices (2020–2021).
• Migrated platforms processing billions of daily events to new datacenters with zero SLA impact (2021).

SRE, Reliability Culture & Organizational Maturity (2020 to 2025)
• Institutionalized postmortems and reliability processes (2020).
• Achieved ISO 27001 certification (2022).
• Scaled the SRE organization to 35 engineers across 9 squads (2023).
• Drove a FinOps program generating R$ 5M+ in savings over 24 months (2023–2025).
• Established GitLab as the corporate DevSecOps platform (2023).

Cloud & Platform Modernization (2022 to 2025)
• Migrated a strategic product from Heroku to AWS EKS (2022).
• Upgraded PostgreSQL from 9.6 to 14 for the SMS channel (2023).
• Consolidated corporate logs under Grafana Loki (2025).

Pure Bros (Acquired by Zenvia in 2013)
5 years 5 months

Information Technology Operations Manager
November 2010 - December 2012 (2 years 2 months)
Greater Porto Alegre

I led the Operations team at Brazil's leading Mobile VAS (Value-Added Services) integrator, ensuring reliable and secure delivery of billing, SMS, and SMPP services.

My role involved coordinating three specialized teams — Monitoring, Production, and Infrastructure — responsible for maintaining mission-critical systems across multiple global datacenters. This included servers, firewalls, load balancers, databases, and applications.

The greatest achievement in this role was building collaboration and resilience within the teams, balancing technical demands with the need for continuous service availability that supported millions of mobile users.

Information Technology Infrastructure Manager
May 2010 - November 2010 (7 months)
Porto Alegre, RS - Brazil

During this period I was an IT infrastructure manager of team that is responsible to manage remotely a little farm of servers, firewall, loadbalancers distributed in some datacenter around the world.

Information Technology Infrastructure Coordinator
July 2009 - May 2010 (11 months)
Porto Alegre, RS - Brazil

During this period I was an IT infrastructure coordinator of team that is responsible to manage remotely a little farm of servers, firewall, loadbalancers distributed in some datacenter around the world.

System Administrator / DBA
August 2007 - July 2009 (2 years)

Pólo RS
IT Consultant
October 2000 - August 2011 (10 years 11 months)

Centro Universitário La Salle
Network Administrator
March 2002 - August 2007 (5 years 6 months)

My main challenge in this position was manage Infrastructure team, which were responsible for keeping alive servers, core switches, firewalls, databases (Oracle, SQL Server, PostgreSQL and MySQL), applications, telecommunications systems, telephony systems, UPS systems and IT Budget.

Main projects:

a) Oracle 8i migration: We migrated our old DB server with OS Solaris to HA solution using Oracle 9 and Linux (2003)
b) +700 new structured cabling using CAT 5e (2003 - 2007)
c) +20 Virtual Servers using FreeBSD Jail (2006 - 2007)
d) Private AS connection with RNP and IMPSAT to improve HA (2006)
e) Interconnection of +20 schools using private network with MPLS protocol provided by IMPSAT (2006 - 2007)
f) CMS Solution: To make easy the content management of academic and institutional sites, we implemented a powerful solution using Joomla framework (2006 - 2007)

GoDigital

Support Analyst
October 2000 - March 2002 (1 year 6 months)

My main challenge in this position was manage Infrastructure.

Main responsabilities:
- Keeping alive servers, firewalls, databases (Oracle and SQL Server) and applications
- User support

Centro Universitário La Salle
Support Analyst
March 1997 - October 2000 (3 years 8 months)

My main challenge in this position was manage Infrastructure.

Main responsabilities:
- Keeping alive servers, firewalls, databases (Oracle and SQL Server) and applications
- User support

BCN
Back Office Assistant
September 1990 - February 1996 (5 years 6 months)
